

# Affinix<sup>®</sup> ScoutAI

## Meet your new AI recruiting assistant

Every day a role sits open costs you talent, momentum, and money. ScoutAI is your built-in AI assistant for recruiters and hiring managers. It adds a new layer of intelligence to Affinix<sup>®</sup>, taking on the administrative work that slows recruiting down.

It helps you write job descriptions, get insights into candidate skills and experience, score candidates against roles, and prep interview questions—so you can spend more time with talent.

While most AI tools bolt onto your ATS, ScoutAI lives right inside Affinix<sup>®</sup>, there to support you at every step. No switching platforms. No new login. ScoutAI creates a smarter, faster recruiting process—based on precision, not guesswork.

**Better matches. More connection.**  
**All without leaving Affinix<sup>®</sup>.**

## SCOUTAI HELPS YOU:

- ✓ Generate a job posting from a short description
- ✓ Refine and optimize existing job postings
- ✓ Score candidates against job requirements
- ✓ Generate a candidate match score and a concise candidate insights summary
- ✓ Create a customized skills matrix using the job title, advertisement, or position description
- ✓ Assess candidates against a job description or custom skills matrix
- ✓ Produce relevant, structured, and role-specific interview questions
- ✓ Detect AI-assisted résumés

Perfect! I've loaded the job details below. Now choose how you'd like to create the description.

### Candidate Match Scores & Insights

Automatically assess candidate suitability against a position description, job ad, or a custom skills matrix using the submitted résumé. ScoutAI analyzes experience, skills, qualifications, and achievements to generate a match score out of 100 and a concise candidate summary, helping reduce manual screening time and identify high-potential candidates faster.

### AI Candidate Summaries

Automatically generate concise candidate summaries highlighting relevant experience, skills, and suitability for the role, available directly within the candidate record, so recruiters can review applications faster.

### Build a Skills Matrix

Generate a job-specific skills matrix from the job title and position description. Review and refine AI-generated skills, then add, edit, remove, and prioritize using adjustable weightings to match your hiring priorities.

#### 🏆 ScoutAI Scored Candidates

Ranked By Match Score

|   |                                                     |                     |
|---|-----------------------------------------------------|---------------------|
| 1 | <b>Marcus Torres</b><br>Data Engineer II . 6 yrs    | STRONG MATCH 83/100 |
| 2 | <b>Daniel Rivera</b><br>Software Engineer . 7 yrs   | STRONG MATCH 83/100 |
| 3 | <b>Mei Flores</b><br>Analytics Engineer . 5 yrs     | STRONG MATCH 82/100 |
| 4 | <b>Raj Wright</b><br>Data Platform Engineer . 6 yrs | STRONG MATCH 82/100 |

## DEFINE & INTERVIEW

# Set the bar, then hire against it

### AI-Generated Interview Questions

Generate structured, role-specific reference questions tailored to a position description or a specific candidate profile. ScoutAI analyzes required skills, responsibilities, competencies, and experience to produce ready-to-use questions for the interview.

### AI-Assisted Résumé Detection

Where enabled, this feature helps flag whether a candidate's résumé may have been generated using AI—giving recruiters an added layer of insight when assessing applications.
